

# Course Based Registration

**= Academic programs converting through CBR**  
The number on the car represents the phase (1, 2, 3, etc.) each program converts in.

**= Extent of curriculum conversion**  
Some programs remain relatively fixed on curriculum (e.g., Nursing, Apprenticeship), while others become flexible with many electives. Some undergo full renewal, while others realign with CBR guidelines.

**= On-Ramps**  
International students have access to Term 1 pathway courses and block registration to maximize student retention. Students with previous learning are supported through RPL processes.

**= Road to employment**  
The bridge leads our students to destinations such as jobs, careers and industry needs.  
The bridge comprises three pillars: **Academic, Financial and Enrolment**.  
Tiers within the pillars represent key CBR elements that inform our design and approach.

**= Destination**  
Successful graduates, ready for industry.

## ENROLMENT

- Effective student planning and registration
- Scheduling options
- Catalog maintenance
- Curriculum management

## FINANCIAL

- Transparency of costs for students
- New tuition and fee model
- Consistent program costings
- Understanding program costs at course level

## ACADEMIC

- Interdisciplinary options and electives
- Work Integrated Learning
- Inclusion of human skills
- Part-time options for students
- Common terms and credit units
- Credential framework
