

Do treat your instructors' materials and your completed work with respect.

Do ask yourself these questions:

Are these my own lecture notes or study materials?

If they are not, you can't share them without permission.

Who am I deciding to share my materials with?

What are their *terms of service*? Are they trustworthy? Do I have to pay? Do I need to provide my personal information? Where will my information be stored?

FILE-SHARING

Do's and Don'ts of sharing course notes and study materials

Don't share files that are not yours because these are protected by copyright law. This includes educational material and assignments provided by your instructor as part of your course.

Don't share your completed assignments with other students. You will face consequences if other students use your work to cheat.

Don't get caught in file sharing services by uploading your completed work for others to use, in order to gain access to completed work for your own use. Sharing answers to your instructors' assignments is an academic integrity violation, and compromises the instructional material in your program.

Don't share your personal information with individuals or companies if you cannot be sure how and where that information will be used.
